Do you know?

SEABUCKTHORN

- Seabuckthorn is extremely resistant to drought, cold and barrenness, and it is known as the best in the world!
- The only plant that can grow in the "Earth Cancer" arsenic region!
- It is the only plant that can survive a temperature difference of 98 degree Celsius, which is from -43 degree Celsius to 55 degree Celsius!
- Seabuckthorn fruit is the only plant that has experienced the four seasons of spring, summer, autumn and winter!

A five-year seabuckthorn plant has a taproot of 3 to 5m and horizontal roots of 6 to 10m. The fibrous roots are densely integrated into a network, which can prevent soil erosion and resist floods or heavy rains.

An Umbrella above the ground, A Blanket on the ground, and A Net under the ground

 Miracle Fruit that rejuvenates horses & make their hair shines

 Recorded in China's first medical book "Chinese Pharmacopoeia" & Tibet's classic medical book "The Book of the Four Tantras"

 Used as part of astronaut's supplement diet to combat radiation

 The nutrients contained in seabuckthorn are adapted to the needs of the human body!

 Rich in vitamins, it is known as the "King of Vitamin C", the crown of fruits and vegetables!

 The only plant in the world has established an international management organization—International Seabuckthorn Association!

Seabuckthorn,

called A "Miracle Berry" by many doctors around the world. Seabuckthorn is a powerful total health and beauty aid harvested and developed in Inner Mongolia. This cherished superfruit is rich in antioxidants, essential amino acids, vitamin E, rare Omega 7 and hundreds of other bioactive nutrients.
